

FIRE SAFETY GRANTS

The NJFSAB offers up to \$1,000 in grants to Fire Departments to promote fire safety education. The grant helps to fund the construction of a Side-by-Side Burn Demonstration. This live action tool can be used by departments to show how quickly fires spread and the effectiveness of fire sprinklers for flame suppression.

The Side-by-Side Burn Demonstration is perfect for outdoor community and educational events such as:

- Fire Prevention Nights
- Fire Department Open Houses
- Continuing Education Seminars
- Festivals or Fairs
- Large Public Gatherings

The demonstration features two fully furnished rooms that are set ablaze--but only one has a fire sprinkler system. Audiences will learn firsthand how fire sprinklers work, and the important role fire sprinklers play in saving lives and property.

Apply today for a grant to build a Side-by-Side Burn Demonstration for your department.
